Subject: Re: New York Radiological Site Update

Good Morning

I have left a message for the health physicists to see if they have a Rueter Stokers solution. Can you check on our end to see what Weston used last year? This was the model that provided any PIC data for Pre-Remedial.

Thanks

Regards,

Eric

Good morning Eric,

As at close of business yesterday, we were unable to find a rental company that has the Reuter Stokes131 PIC (RSS-131 PIC). Based on information from our equipment manager, this instrument is unavailable for rental. Please let me know thoughts regarding this situation.

Canister count for Niagara Falls Blvd site was 71 if we want to be specific.

I will wait to hear from you today regarding additional information for the CRU site and specific requirements for radon canister and soil sampling.

Thanks.

Hi Everyone:

I thought I would get some information from Dan Gaughan today regarding specifics from his trip to Canadian Radium this afternoon. However, his trip took most of the day and he will be sending a write up tomorrow. Being that I have to drive back to NJ tomorrow and it's a Friday, I think it is going to be hard to get a lot of info to you all. However, I will be taking rest stop breaks and checking email. So if I can get some more specifics than below, I will. Joel and Ben, please let me know if I forgot anything. Thanks

Canadian Radium & Uranium Site:

- <!--[if !supportLists]--><![endif]-->We will be mobilizing to the Site on August 3rd.
- <!--[if !supportLists]--><![endif]-->**4 Weston Technicians needed this week.**
- <!--[if !supportLists]--><![endif]-->The Radon Specialist schedule will be Monday & Tuesday drop off and Thursday & Friday pick up.
- <!--[if !supportLists]--><![endif]-->Radon Canister numbers should be 75-90. I am hoping to get a better idea from Dan.
- <!--[if !supportLists]--><![endif]-->Soil Boring Sampling-At this point we have not been given any further information on this from Dan or the Health Physicists.
- <!--[if !supportLists]--><![endif]-->Please let me know the status of the Reuter Stokes131 PIC (RSS-131 PIC) rental. We are hoping to get one by Tuesday in order to have a training on Wednesday with Oleg in the Edison Office. We will need this instrument (Like the Rad7 Units) until we finish the three assessments.

Holy Trinity & Niagara Falls Boulevard Sites:

- <!--[if !supportLists]--><![endif]-->We will be mobilizing to the Sites on August 10th **with a travel day on August 9th**. Due to the

Radon Specialist and deploying of the canisters at both sites, we need to be there first thing Monday morning.

- <!--[if !supportLists]--><![endif]-->We should only need **two Weston Technicians** for this week's work.
- <!--[if !supportLists]--><![endif]-->The Radon Specialist schedule will be Monday & Tuesday drop off and Thursday & Friday pick up.
- <!--[if !supportLists]--><![endif]-->Ben can correct me but I believe we are looking to deploy 75 canisters at Niagara Falls Boulevard and 12 at Holy Trinity.
- <!--[if !supportLists]--><![endif]-->We will definitely need to conduct soil boring sampling. About 20 samples. This is going to be conducted Wednesday August 12th.
- <!--[if !supportLists]--><![endif]-->We still have some property boundary issues to work through since we got the parcel information today. It doesn't appear that we need have the metes and bounds survey.

Regards,

Eric
